Project Report for The SimpleRPG Game(GUI version)

-- Group No.120 -- Assignment 2--

Student Info:
Name: JC Zhi
Student ID: 22184358
Email: tzf6057@autuni.ac.nz

I am working individually on this assignment 2 -- development of the SimpleRPG game. Here are some notes for the project.

1. This is an **individual project**, so NO contribution report.

2. The Git is hidden under main folder OR you can check the public repository on GitHub:
https://github.com/VegePizza/SimpleRPG.git

3. There are **9 interactions with the database** in total.
("ReadWriteDB.java" and "PlayerScores.java").
While playing, you can click button "Scores" checking its implementation.

4. All **OOP concepts** are there(including Interface, mainly in the SimpleCharacter package) also along with **MVC, Embedded Database** using Derby.

5. There are **7 test cases** in "TreasureHuntTest.java" using Junit4.

6. When first run on your machine, it should automatically run the GUI of "FirstMainFrame.java" using Netbeans IDE.

7. **Enjoy** the game!
